

CRYPTOHOLIC ACADEMY

WHITE PAPER
v. 1.01

Introduction

Since the Bitcoin whitepaper was published in 2008 ([Bitcoin: A Peer-to-Peer Electronic Cash System](#)) by Satoshi Nakamoto /Thank you Satoshi!/ the world has been changed. The blockchain technology and new understanding of money were presented. New era has begun! At the very first stages not many people were involved into the blockchain but from year to year the public interest was growing fast. [Vitalik Buterin](#) had made the next huge step in popularization of the blockchain technology /Greetings Vitalik/ working on Ethereum as an open source, public, blockchain-based distributed computing platform and operating system featuring smart contract functionality since late 2013. Finally the Ethereum blockchain went to live on summer 2015. The boom of smart contracts has begun. Many new startups or crypto projects were born. More people took a part in...

The era of ICO's brings a lot of opportunities for startups to raise funds for development. Unfortunately, not all projects were fairly honest or legitimate, some of them were born for the sole purpose – to scam people. The dark side of the technology went to live too. Many people were scammed and had lost a lot of money. Unfortunately, no one can stop this fraudulent epidemic, but together we could help reduce its impact. We have a medicine based on our experience!

Cryptoholic Academy Mission

We strongly believe that a vaccine from scam epidemic exists and its name is knowledge! We want to share our knowledge with everyone! That is why we are launching our **Cryptoholic Academy Educational Platform**.

Who we are

We are the group of individuals who have more than 3 years of experience in the crypto field. Our team members were involved in different crypto projects during the past years, working as team members of projects or investing in it. A huge experience had been collected from both sides. Now we have some unique knowledge and ready to share it with our audience.

What is Cryptoholic Academy Educational Platform

Cryptoholic Academy is an educational nonprofit project based on our experience and knowledge in crypto field. It has our unique understanding how to represent the information. It is lifetime free for everyone.

Cryptoholic Academy has "live structure", which means that everyone who wants to be involved could take a part in our project, of course if they have the same vision as we do. We are flexible and responsive. We are going to grow together with the audience and community. We have a lot of ideas and plans to implement.

Cryptoholic Academy is forever free for everybody and could be useful for wise majority of people especially for those who are entering the crypto world right now. We can't teach people how to earn money, but we could help them to save some. Our educational program based on our own experience which we had collected in recent years. We know things that are not usually showing to the public. We are going to share it with everyone in a smart, simple and sometimes funny way. At the first stage we are planning to produce short 3D animated videos with useful tips, real stories, personal experience which could help to understand many aspects of crypto life in easy way.

Cryptoholic Academy Token

Cryptoholic Academy educational content will be forever free for everyone. At present, our own resources are limited and not sufficient to implement all our ideas and plans... that is why we have decided to launching first ever Initial Crypto Donation Request Procedure ICDRP (how we name it). That means that we have deployed our own smart contract and created Cryptoholic Academy Donation Token (CADT).

Cryptoholic Academy Donation Token is ERC-20 compatible custom token. The main aim of it - donations for support our project. It has fixed value of 0.01 USD (one cent). Anyone who sends some ETH on our smart contract address will get some CADT back. We also will have other options to support our project, in such cases we will send CADT back to our supporters from special wallets with the same rate to USD equivalent (1CADT = \$0.01).

Please visit our website [Support Us](#) section to know how you could support our educational platform. Donations are Welcomed! Thank you!

CADT economic model

We strongly believe that Knowledge should be available for everyone. Using that philosophy we have decided to create 7,777,777,777 CADT tokens with the fixed value of \$0.01 each. That number is close to current Earth population!

We have already mentioned that all our educational content will be forever free for everyone. We perfectly understand that it is not possible to collect donations on all number of tokens covered by total supply, but we are planning to be ON for as long period of time as it ever possible. We hope that we will be supported for all the time too.

Total Supply: 7,777,777,777 CADT

Fixed value: \$0.01 for 1 CADT

CADT is a donation token with a fixed value.

No official listings on any exchange during first 5 years planned and not guaranteed in the future!

Smart contract address will get 3,333,333,333 CADT at the moment of creation.

Another 4 team owned addresses will get 1,111,111,111 CADT each for safety reasons. Those 4 addresses will be used for sending CADT tokens for BTC and other type of donations. As well as for making partnerships, advertizing and so on, even for listings (if such decision will be made in the future).

CADT burning schedule and key facts

Summer 2023 we are going to burn 30% of all not distributed by that time tokens.

Summer 2024 we are going to burn 50% of all not distributed by that time tokens.

The question about platform decentralization will be discussed in autumn 2024. The final decision will be made by the 31 Dec 2024

Summer 2025 we will make our final decision about the possibility of listing and after that 100% of all not distributed by that time tokens will be burned.

Official listing and platform decentralization are not guaranteed!

Roadmap

1st year (Q2 2020 - Q2 2021)

The first year is the most important to build a strong basis of project. Huge support and growing community are extremely necessary for us. Making new friends, building an audience, collecting funds for the expanding are the main aims for the first year.

We are going to start with the Web Series with codename "ISO". "ISO" is 3D animated educational Web Series, with live and interactive scenario. The main ISO's screenplay is about "what is going on inside one virtual crypto project", it is based on the real experience. Live scenario means that it is open-ended and could be changed spontaneously according to the interaction with our audience

Along the "ISO" at the first year we will share some personal thoughts and experience in the short animated interviews with the team and may be with some of our supporters. Useful tips will be given too.

2nd year (Q2 2021 - Q2 2022)

According to the first year results decision about ISO's 2nd season will be made. We hope that by that time we will have enough funds to grow the team for building full featuring educational platform. Along that we will continue to share personal experience hopefully together with the invited experts.

3rd year (Q2 2022 - Q2 2023)

We are planning to make partnerships with individuals or institutional who are interested to cooperate with us for building a strong educational platform. Summer 2023, 30% of all not distributed by that time tokens will be burned.

4th year (Q2 2023 - Q2 2024)

No one could predict what could be in future especially after 3 years distance. We are also not going to mislead our supporters making such predictions. We hope that we will have a strong educational platform with the good value of knowledge, partnerships with well known people and organizations as well as huge audience. All decisions about next two years will be made according the first 3 years results. Summer 2024 we are going to burn 50% of all not distributed by that time tokens.

5th year (Q2 2024 - Q2 2025)

The question about platform decentralization will be discussed in autumn 2024. The final decision will be made by the 31 Dec 2024. According the decisions were made about platform's decentralization, next steps will be discussed. Further roadmap stages will be discussed as well as listing options. In Summer 2025 we will make our final decision about the possibility of listing and after that 100% of all not distributed by that time tokens will be burned.

Further steps

We have already mentioned that it is hard to predict future especially in crypto world. We will consider our next steps according the current project state. In the case of necessity, the questions about platform decentralization and listings could be raised again but it will not be guaranteed as well!

Cryptoholic Academy Donation Token Data

Smart contract address:	0x9557A956202DfEa21b910afb96ac4D2FF7783cfa
Token name:	CADT
Decimals:	8
